Lantal ready-to-install literature pockets offer the following key advantages:

- **Colors, shapes and materials can be individually combined**
- **The pockets are developed to match the seats perfectly**
- **Easy installation, ready for use in as-delivered state**
- **Compliance with all relevant bus and railway safety requirements**

Specifications

Materials

The literature pockets can be produced according to customer specifications. The choice of materials includes netting and flat weaves as well as leathers and plastics.

Designs and colors

Lantal literature pockets are developed and manufactured to meet the customer's requirements. The netting is available in different colors and types of meshing.

The shape, colors and materials of the frame are also customizable. Lantal will be happy to advise you and offers custom design options.

Development and tailoring

Lantal works closely with the customer when developing the literature pockets. Prototypes are developed and analyzed together before the product enters production. The finished literature pockets are then shipped to the seat manufacturer in ready-to-install form.

Safety

Lantal products are flame-resistant and they comply with the fire standards and requirements of the particular applications. DIN 5510-2, UN-ECE-R118.02 and FMVSS 302.
