

Finishing for textiles for trains

Hygienic finish for seat cover fabrics and curtains

Key advantages

The Lantal hygienic finish for textiles shows the following compelling key advantages:

- **Maintains the natural functionality of the fibres**
- **Permanent material protection**
- **Lasting hygienic freshness and comfort**
- **Prevents mildew spots and unpleasant odours caused by microbes**
- **Inhibits growth of microorganisms**
- **The active substance is free from AOX**
- **Dermatologically tested**
- **Safe for mankind and environment**

Mode of action and advantages

The Lantal hygienic finish for textiles has a reliable and durable bacteriostatic effect against a large number of gram-positiv and gram-negative bacteria and some yeasts.

The finishing acts on the cell membrane of bacteria, causing its "lysis", i.e. cell decomposition. The hygienic finishing for textiles is bound to the fiber.

Application area

The hygienic finish can be applied to Lantal seat cover fabrics as yardage in velvet standard qualities and to Lantal curtain as yardage in polyester

The hygienic finish and the stain-repellant finish cannot be applied together on velvet seat cover fabrics. Only one of the two finishings can be used.

On seat cover fabrics in flat weaves, neither of the two finishings can be used.

Safety and standards

Lantal products are flame-resistant and comply with the standards and specifications for trains EN 45545-2 / DIN 5510-2 / NF F16-101.

Cleaning

Cleaning according to Lantal cleaning recommendations.
